PERGAMON

Journal of the Mechanics and Physics of Solids
50 (2002) III–XII

JOURNAL OF THE MECHANICS AND PHYSICS OF SOLIDS

www.elsevier.com/locate/jmps

CONTENTS OF VOLUME 50

Number 1

L.B. FREUND and J.R. WILLIS	1	JMPS
M.E. GURTIN	5	A gradient theory of single-crystal viscoplasticity that accounts for geometrically necessary dislocations
A.P. ROBERTS and E.J. GARBOCZI	33	Elastic properties of model random three-dimensional open-cell solids
O. OBREZANOVA, A.B. MOVCHAN and J.R. WILLIS	57	Stability of an advancing crack to small perturbation of its path
K.C. HWANG, H. JIANG, Y. HUANG, H. GAO and N. HU	81	A finite deformation theory of strain gradient plasticity
S. BALASUBRAMANIAN and L. ANAND	101	Elasto-viscoplastic constitutive equations for polycrystalline fcc materials at low homologous temperatures
C.M. LANDIS	127	Fully coupled, multi-axial, symmetric constitutive laws for polycrystalline ferroelectric ceramics
J. WEERTMAN	153	Why the stress trajectories in the Dean–Hutchinson plastic sector of the growing mode III crack are an unfocused fan

Number 2

G. PUGLISI and L. TRUSKINOVSKY	165	Rate independent hysteresis in a bi-stable chain
L. TRUSKINOVSKY and G. ZANZOTTO	189	Elastic crystals with a triple point

M. CHARLOTTE and L. TRUSKINOVSKY 217 Linear elastic chain with a hyper-prestress

I. SEVOSTIANOV and M. KACHANOV 253 Explicit cross-property correlations for anisotropic two-phase composite materials

A. DE SIMONE and R.D. JAMES 283 A constrained theory of magnetoelasticity

M.-N. BUSSAC, P. COLLET, G. GARY and R. OTHMAN 321 An optimisation method for separating and rebuilding one-dimensional dispersive waves from multi-point measurements. Application to elastic or viscoelastic bars

M. DANIELSSON, D.M. PARKS and M.C. BOYCE 351 Three-dimensional micromechanical modeling of voided polymeric materials

K. ERIKSSON 381 A domain independent integral expression for the crack extension force of a curved crack in three dimensions

I Keywords

Number 3

P.E.W. LABOSSIERE, M.L. DUNN and S.J. CUNNINGHAM 405 Application of bimaterial interface corner failure mechanics to silicon/glass anodic bonds

Z.P. BAŽANT 435 Scaling of dislocation-based strain-gradient plasticity

W. YAN, N.P. O'DOWD and E.P. BUSSO 449 Numerical study of sliding wear caused by a loaded pin on a rotating disc

D. BIGONI and D. CAPUANI 471 Green's function for incremental nonlinear elasticity: shear bands and boundary integral formulation

G.J. HALL and S. GOVINDJEE 501 Application of a partially relaxed shape memory free energy function to estimate the phase diagram and predict global microstructure evolution

A. MUGADU, D.A. HILLS and L. LIMMER 531 An asymptotic approach to crack initiation in fretting fatigue of complete contacts

S. ZHANG, K.J. HSIA and A.J. PEARLSTEIN 549 Potential flow model of cavitation-induced interfacial fracture in a confined ductile layer

E. FRIED 571 An elementary molecular-statistical basis for the Mooney and Rivlin–Saunders theories of rubber elasticity

L. PECHENIK, H. LEVINE and D.A. KESSLER 583 Steady-state mode I cracks in a viscoelastic triangular lattice

R.V. KUKTA and K. BHATTACHARYA 615 A micromechanical model of surface steps

T.J. LIM and D.L. MCDOWELL 651 Cyclic thermomechanical behavior of a polycrystalline pseudoelastic shape memory alloy

Y.F. DAFALIAS 677 Corrigendum to "Orientational evolution of plastic orthotropy in sheet metals" [J. Mech. Phys. Solids 48 (2000) 2231–2255]

V.I. LEVITAS 679 Corrigendum to "A new look at the problem of plastic spin based on stability analysis" [J. Mech. Phys. of Solids 46 (3) (1998) 557–590]

Number 4

J.G. SWADENER, E.P. GEORGE and G.M. PHARR 681 The correlation of the indentation size effect measured with indenters of various shapes

S. PITAKTHAPANAPHONG and E.P. BUSSO 695 Self-consistent elastoplastic stress solutions for functionally graded material systems subjected to thermal transients

R.C. PICU 717 The Peierls stress in non-local elasticity

P.P. CASTAÑEDA 737 Second-order homogenization estimates for nonlinear composites incorporating field fluctuations: I—theory

P.P. CASTAÑEDA 759 Second-order homogenization estimates for nonlinear composites incorporating field fluctuations: II—applications

B. PEETERS, S.R. KALIDINDI, C. TEODOSIU, P.V. HOUTTE and E. AERNOUDT	783	A theoretical investigation of the influence of dislocation sheets on evolution of yield surfaces in single-phase B.C.C. polycrystals
J.G. WILLIAMS and H. HADAVINIA	809	Analytical solutions for cohesive zone models
H. SCHÜTTE and O.T. BRUHNS	827	On a geometrically nonlinear damage model based on a multiplicative decomposition of the deformation gradient and the propagation of microcracks
R. PARNES and A. CHISKIS	855	Buckling of nano-fibre reinforced composites: a re-examination of elastic buckling
Z.-Y. REN and Q.-S. ZHENG	881	A Quantitative study of minimum sizes of representative volume elements of cubic polycrystals—numerical experiments
B. CHIAIA	895	On the sliding instabilities at rough surfaces

Number 5

H. PETRYK and K. THERMANN	925	Post-critical plastic deformation in incrementally nonlinear materials
C. CHEN and N.A. FLECK	955	Size effects in the constrained deformation of metallic foams
R.S. LAKES and W.J. DRUGAN	979	Dramatically stiffer elastic composite materials due to a negative stiffness phase?
R. HUANG, Z. SUO, J.H. PREVOST and W.D. NIX	1011	Inhomogeneous deformation in metallic glasses
W.S. KREHER	1029	Influence of domain switching zones on the fracture toughness of ferroelectrics
M. BROCCA, L.C. BRINSON and Z.P. BAŽANT	1051	Three-dimensional constitutive model for shape memory alloys based on microplane model
M. HUANG, Z. SUO and Q. MA	1079	Plastic ratcheting induced cracks in thin film structures

M. KOTOUL 1099 Constitutive modelling of cyclic plasticity of metal particulate-reinforced brittle matrix composites under compression–compression loading

N. OHNO, D. OKUMURA and H. NOGUCHI 1125 Microscopic symmetric bifurcation condition of cellular solids based on a homogenization theory of finite deformation

V. SHENOY and A. SHARMA 1155 Stability of a thin elastic film interacting with a contactor

Number 6

S. NEUKIRCH, G.H.M. VAN DER HEIJDEN and J.M.T. THOMPSON 1175 Writhing instabilities of twisted rods: from infinite to finite length

S.-C. NGAN and L. TRUSKINOVSKY 1193 Thermo-elastic aspects of dynamic nucleation

O. SAMUDRALA, Y. HUANG and A.J. ROSAKIS 1231 Subsonic and intersonic mode II crack propagation with a rate-dependent cohesive zone

H. WANG and G. SUBHASH 1269 Mechanics of mixed-mode ductile material removal with a conical tool and the size dependence of the specific energy

B. SVENDSEN 1297 Continuum thermodynamic models for crystal plasticity including the effects of geometrically-necessary dislocations

A.A. BENZERGA 1331 Micromechanics of coalescence in ductile fracture

Number 7

S.J.S. MORRIS 1363 Coupling of interface kinetics and transformation-induced strain during pressure-induced solid–solid phase changes

A. BALTAZAR, S.I. ROKHLIN and C. PECORARI 1397 On the relationship between ultrasonic and micromechanical properties of contacting rough surfaces

A. MUGADU and D.A. HILLS 1417 Characterising the process zone in complete fretting contacts using plain fatigue sharp V-notch specimens

S. CONTI, A. DESIMONE and G. DOLZMANN 1431 Soft elastic response of stretched sheets of nematic elastomers: a numerical study

M. DESTRADE, P.A. MARTIN and T.C.T. TING 1453 The incompressible limit in linear anisotropic elasticity, with applications to surface waves and elastostatics

A.G. VARIAS and A.R. MASSIH 1469 Hydride-induced embrittlement and fracture in metals—effect of stress and temperature distribution

L. STAINIER, A.M. CUITIÑO and M. ORTIZ 1511 A micromechanical model of hardening, rate sensitivity and thermal softening in bcc single crystals

Number 8

D.V. KUBAIR, P.H. GEUBELLE and Y.Y. HUANG 1547 Intersonic crack propagation in homogeneous media under shear-dominated loading: theoretical analysis

A.M. KARLSSON, J.W. HUTCHINSON and A.G. EVANS 1565 A fundamental model of cyclic instabilities in thermal barrier systems

L.I. SLEPYAN and M.V. AYZENBERG-STEPANENKO 1591 Some surprising phenomena in weak-bond fracture of a triangular lattice

R. FOSDICK and G. ROYER-CARFAGNI 1627 The Lagrange multipliers and hyperstress constraint reactions in incompressible multipolar elasticity theory

F. COSTANZO and J.R. WALTON 1649 Steady growth of a crack with a rate and temperature sensitive cohesive zone

J.C. CRISCIONE, A.D. McCULLOCH and W.C. HUNTER 1681 Constitutive framework optimized for myocardium and other high-strain, laminar materials with one fiber family

E. BOUCHAUD, J.P. BOUCHAUD, D.S. FISHER, S. RAMANATHAN and J.R. RICE 1703 Can crack front waves explain the roughness of cracks?

O. NGUYEN and M. ORTIZ 1727 Coarse-graining and renormalization of atomistic binding relations and universal macroscopic cohesive behavior

P. STEINMANN 1743 On spatial and material settings of hyper-elastostatic crystal defects

M.A. WADEE 1767 Localized buckling in sandwich struts with pre-existing delaminations and geometrical imperfections

Number 9

P. BĚLÍK and M. LUSKIN 1789 A computational model for the indentation and phase transformation of a martensitic thin film

V.B. SHENOY and L.B. FREUND 1817 A continuum description of the energetics and evolution of stepped surfaces in strained nano-structures

G.M. VASKO, P.H. LEO and T.W. SHIELD 1843 Prediction and observation of crack tip microstructure in shape memory CuAlNi single crystals

R.W. OGDEN and D.J. STEIGMANN 1869 Plane strain dynamics of elastic solids with intrinsic boundary elasticity, with application to surface wave propagation

S. GOVINDJEE, A. MIELKE and G.J. HALL 1897 The free energy of mixing for *n*-variant martensitic phase transformations using quasi-convex analysis

R.C. PICU 1923 On the functional form of non-local elasticity kernels

M. ARROYO and T. BELYTSCHKO 1941 An atomistic-based finite deformation membrane for single layer crystalline films

A. ARSENLIS and D.M. PARKS 1979 Modeling the evolution of crystallographic dislocation density in crystal plasticity

G. MARCKMANN, E. VERRON, L. GORNET, G. CHAGNON, P. CHARRIER and P. FORT 2011 A theory of network alteration for the Mullins effect

Number 10

J. LARSSON and B. STORÅKERS 2029 On oblique contact of creeping solids

D.N. BHATE, A.F. BOWER and A. KUMAR 2057 A phase field model for failure in interconnect lines due to coupled diffusion mechanisms

L.E. SHILKROT, W.A. CURTIN and R.E. MILLER 2085 A coupled atomistic/continuum model of defects in solids

J. SEGURADO and J. LLORCA 2107 A numerical approximation to the elastic properties of sphere-reinforced composites

C. MIEHE, J. SCHOTTE and M. LAMBRECHT 2123 Homogenization of inelastic solid materials at finite strains based on incremental minimization principles. Application to the texture analysis of polycrystals

H. GAO, L. ZHANG and S.P. BAKER 2169 Dislocation core spreading at interfaces between metal films and amorphous substrates

L. DORMIEUX, A. MOLINARI and D. KONDO 2203 Micromechanical approach to the behavior of poroelastic materials

G.J. HALL and S. GOVINDJEE 2233 Errata to "Application of a partially relaxed shape memory free energy function to estimate the phase diagram and predict global microstructure evolution" [J. Mech. Phys. Solids 50 (3) (2002) 501–530]

E. FRIED 2235 Errata to "An elementary molecular-statistical basis for the Mooney and Rivlin–Saunders theories of rubber elasticity" [J. Mech. Phys. Solids 50 (3) (2002) 571–582]

Number 11

G. BAO 2237 Mechanics of biomolecules

S. NIKOLOV, I. DOGHRI, O. PIERARD, L. ZEALOUK and A. GOLDBERG 2275 Multi-scale constitutive modeling of the small deformations of semi-crystalline polymers

S. STUPKIEWICZ and H. PETRYK 2303 Modelling of laminated microstructures in stress-induced martensitic transformations

S.L. DOS SANTOS E LUCATO, H.-A. BAHR, V.-B. PHAM, D.C. LUPASCU, H. BALKE, J. RÖDEL and U. BAHR	2333	Electrically driven cracks in piezoelectric ceramics: experiments and fracture mechanics analysis
M.W. MOON, H.M. JENSEN, J.W. HUTCHINSON, K.H. OH and A.G. EVANS	2355	The characterization of telephone cord buckling of compressed thin films on substrates
B. ROMAN and A. POCHEAU	2379	Postbuckling of bilaterally constrained rectangular thin plates
L.P. EVERS, D.M. PARKS, W.A.M. BREKELMANS and M.G.D. GEERS	2403	Crystal plasticity model with enhanced hardening by geometrically necessary dislocation accumulation
K. WATANABE and R.G. PAYTON	2425	Green's function for SH-waves in a cylindrically monoclinic material
F.M. BORODICH and B.A. GALANOV	2441	Self-similar problems of elastic contact for non-convex punches
R.S. ELLIOTT, J.A. SHAW and N. TRIANTAFYLLIDIS	2463	Stability of thermally-induced martensitic transformations in bi-atomic crystals
R. HILL	2495	Homogeneous processes of plane deformation in solids: an in-depth analysis of the geometry and kinematics

Number 12

Z. HASHIN	2509	Thin interphase/imperfect interface in elasticity with application to coated fiber composites
G. JEFFERSON, G.K. HARITOS and R.M. MCMEEKING	2539	The elastic response of a cohesive aggregate—a discrete element model with coupled particle interaction
G. DEBOTTON and I. HARITON	2577	High-rank nonlinear sequentially laminated composites and their possible tendency towards isotropic behavior
M. KOSLOWSKI, A.M. CUITIÑO and M. ORTIZ	2597	A phase-field theory of dislocation dynamics, strain hardening and hysteresis in ductile single crystals

O. OBREZANOVA, A.B. MOVCHAN and J.R. WILLIS	2637	Dynamic stability of a propagating crack
X. CHEN and J.W. HUTCHINSON	2669	Particle impact on metal substrates with application to foreign object damage to aircraft engines
E. FRIED and R.E. TODRES	2691	Disclinated states in nematic elastomers
C. LEXCELLENT, A. VIVET, C. BOUVET, S. CALLOCH and P. BLANC	2717	Experimental and numerical determinations of the initial surface of phase transformation under biaxial loading in some polycrystalline shape-memory alloys
